Cardiac arrest can occur anytime to anyone, at any place, and may threaten yours or others lives if the appropriate CPR and/or electric shock with a defibrillator are not applied within a few minutes. **Code: BIOCU-SPI**

So, help to save a life with the iPad SP1 Fully Automatic defibrillator , it is suitable for use in a variety of environments and comes equipped with a paediatric switch, allowing users to easily change the treatment from adult mode to paediatric mode without the

Charging time of 10 seconds.
Auto volume adjusting, up to 90 decibels.
Smart pads storage underneath the device (pre-connected in a clear compartment).
Smart CPR detection with voice prompts.
Easy communication - Internal memory stores the last 3 hours of data to an SD card.
Patient mode switch - easily switch from adult to child mode without switching pads.
Comes with 2 pads ,dual Adult/Child

The amazing technology ensures both trained and *untrained* responders are capable of delivering a shock to a cardiac arrest patient. The additional feature of adjusting verbal instructions, ensures users can hear each step of the rescue process as it adjusts to the surrounding environment.
